

How to register for a locator

Registration for a locator allows you to advertise your lamb and sheep for consumption and breeding. You can also advertise the sale of guardian animals.

To register for a locator, click on the register button and fill in the information fields for the locator that you have selected.

Note: you can select more than one category by simply holding down the control button (labelled ctrl) on your keyboard and clicking on the categories that apply to your registration.

Your submission will be received at the OSMA office and you will be contacted if any questions arise.
